NAVIGSA PROJECT

Individual Agile Team Charter

Name: Witcha Francisco
Module: PRP – Project Presentation (PFP362S)
Student Number: 222894822
Role: Editor
Date: 27 October 2026

1. Team Purpose

Objective

The NavigSA project aims to design and validate a solution that helps international students navigate complex processes in South Africa, including SAQA evaluation, university applications, study visas, and accommodation.

As the Editor, I ensure all deliverables are clear, well-structured, professional, and aligned with academic standards. My role focuses on transforming team contributions into a high-quality final document.

Vision Statement

> *"To deliver a clear, professional, and well-structured final report that effectively communicates the NavigSA solution and reflects high academic standards."*

2. Team Roles and Responsibilities

Team Members: Witcha Francisco (Editor), Tanatswa Mabhodha (Researcher), Marc Kabala (Designer), Nolwazi Zulu (Team Leader / Presenter).

Editor Responsibilities

- Review and edit all written content for clarity, grammar, and academic tone.
- Ensure consistency in formatting, structure, and writing style.
- Integrate all team contributions into one unified document.
- Align content with assignment requirements and marking rubric.
- Improve readability of complex research and technical information.
- Ensure logical flow between sections.
- Collaborate with team members to refine content.
- Prepare the final submission-ready version of the document.

3. Team Values and Principles

Core Values: Collaboration, Respect, Transparency, Accountability, Excellence.

Agile Principles: Continuous improvement through feedback, collaboration over rigid processes, delivering complete work regularly in short sprints, and adapting to changes based on feedback.

4. Communication Plan

Methods: WhatsApp (daily updates), Microsoft Teams (meetings), In-person meetings (weekly), Google Docs (collaboration).

Meeting Frequency: Weekly meetings (minimum) and additional sessions during the final phase.

Editor Responsibilities in Communication

- Provide feedback on team contributions.
- Request missing or unclear content.
- Share updated document versions.
- Ensure final review before submission.

5. Goals and Milestones

SMART Goals

- Ensure all sections are consistent and well-structured by Week 5.
- Complete full editing and proofreading before submission.
- Integrate all contributions into one final document.
- Improve clarity and readability of all content.

Milestones

- Week 3: Initial editing
- Week 4: Structure refinement
- Week 5: Final submission

NAVIGSA PROJECT

Individual Agile Team Charter

Name: Tanatswa Mabhodha
Module: PRP – Project Presentation (PFP362S)
Student Number: 220637482
Role: Researcher
Date: 27 October 2026

1. Team Purpose

Objective

The NavigSA project aims to design and validate a solution that helps international students navigate complex processes in South Africa, including SAQA evaluation, university applications, study visas, and accommodation.

As the Researcher, I gather and verify the information that supports the NavigSA solution, including the evidence of the problem, insights from the student community, and the facts about SAQA, university, and visa processes. My role focuses on making sure our work is accurate, evidence-based, and grounded in real student needs.

Vision Statement

> *"To provide accurate, relevant, and well-sourced research that proves the NavigSA problem and supports the solution."*

2. Team Roles and Responsibilities

Team Members: Witcha Francisco (Editor), Tanatswa Mabhodha (Researcher), Marc Kabala (Designer), Nolwazi Zulu (Team Leader / Presenter).

Researcher Responsibilities

- Research the challenges facing international students applying to South African universities.
- Gather information from official sources such as SAQA, the Department of Home Affairs, and Universities South Africa.
- Plan and conduct interviews with students and service providers.
- Analyse interview results and online community feedback.
- Keep a clear record of all sources for referencing.
- Share findings clearly with the team and the Editor.
- Check that facts used in the report are correct and up to date.
- Support the team with evidence for the final presentation.

3. Team Values and Principles

Core Values: Collaboration, Respect, Transparency, Accountability, Excellence.

Agile Principles: Continuous improvement through feedback, collaboration over rigid processes, delivering complete work regularly in short sprints, and adapting to changes based on feedback.

4. Communication Plan

Methods: WhatsApp (daily updates), Microsoft Teams (meetings), In-person meetings (weekly), Google Docs (collaboration).

Meeting Frequency: Weekly meetings (minimum) and additional sessions during the final phase.

Researcher Responsibilities in Communication

- Share research findings and sources with the team.
- Flag gaps or conflicting information early.
- Respond quickly to requests for additional data.
- Keep research documents organised in the shared Google Docs.

5. Goals and Milestones

SMART Goals

- Complete the core problem research and gather key sources by Week 3.
- Conduct and record structured interviews with at least 8 participants by Week 4.
- Share a clear summary of findings with the team by Week 4.
- Verify all sources and referencing before final submission.

Milestones

- Week 3: Research gathered
- Week 4: Interviews analysed and findings shared
- Week 5: Sources verified and referencing complete

NAVIGSA PROJECT

Individual Agile Team Charter

Name: Marc Kabala
Student Number: 230701876
Date: 27 October 2026
Module: PRP – Project Presentation (PFP362S)
Role: Designer

1. Team Purpose

Objective

The NavigSA project aims to design and validate a solution that helps international students navigate complex processes in South Africa, including SAQA evaluation, university applications, study visas, and accommodation.

As the Designer, I create the visual identity and layout of the NavigSA solution and our deliverables, including branding, the prototype, and presentation visuals. My role focuses on making our work clear, consistent, and visually engaging for the students it is meant to help.

Vision Statement

> *"To design a clear, consistent, and user-friendly visual experience that makes NavigSA easy to understand and trust."*

2. Team Roles and Responsibilities

Team Members: Witcha Francisco (Editor), Tanatswa Mabhodha (Researcher), Marc Kabala (Designer), Nolwazi Zulu (Team Leader / Presenter).

Designer Responsibilities

- Design the visual identity of NavigSA, including branding, colours, and layout.
- Create and refine the prototype and user flow for the platform.
- Design presentation slides and report layouts.
- Keep visuals consistent across all deliverables.
- Make sure designs are simple and easy to understand for non-native English speakers.
- Apply feedback from the team and lecturer to improve designs.
- Provide design files and assets to the team on time.
- Work with the Editor so the layout supports the content.

3. Team Values and Principles

Core Values: Collaboration, Respect, Transparency, Accountability, Excellence.

Agile Principles: Continuous improvement through feedback, collaboration over rigid processes, delivering complete work regularly in short sprints, and adapting to changes based on feedback.

4. Communication Plan

Methods: WhatsApp (daily updates), Microsoft Teams (meetings), In-person meetings (weekly), Google Docs (collaboration).

Meeting Frequency: Weekly meetings (minimum) and additional sessions during the final phase.

Designer Responsibilities in Communication

- Share design drafts with the team for feedback.
- Explain design decisions clearly.
- Request the content needed for layouts.
- Share final design files with the whole team.

5. Goals and Milestones

SMART Goals

- Complete initial design concepts and branding by Week 3.
- Make all visuals consistent across the report, prototype, and presentation by Week 4.
- Improve designs based on team and lecturer feedback.
- Deliver all final design assets by Week 5.

Milestones

- Week 3: Initial design concepts
- Week 4: Prototype and layout refinement
- Week 5: Final design assets delivered

NAVIGSA PROJECT

Individual Agile Team Charter

Name: Nolwazi Zulu
Student Number: 220118876
Date: 27 October 2026
Module: PRP – Project Presentation (PFP362S)
Role: Team Leader / Presenter

1. Team Purpose

Objective

The NavigSA project aims to design and validate a solution that helps international students navigate complex processes in South Africa, including SAQA evaluation, university applications, study visas, and accommodation.

As Team Leader and Presenter, I keep the team aligned, organised, and moving towards its goals, and I represent the team when we present NavigSA. My role focuses on turning individual contributions into one coordinated team effort and a clear, confident presentation.

Vision Statement

> *"To lead a collaborative, well-organised team that delivers a convincing NavigSA solution and communicates it clearly and confidently."*

2. Team Roles and Responsibilities

Team Members: Witcha Francisco (Editor), Tanatswa Mabhodha (Researcher), Marc Kabala (Designer), Nolwazi Zulu (Team Leader / Presenter).

Team Leader Responsibilities

- Coordinate the team and keep everyone aligned with the project goals.
- Plan and facilitate team meetings and daily check-ins.
- Allocate tasks according to each member's role and track progress on the Trello board.
- Identify blockers early and help the team resolve them.
- Make sure deadlines and milestones are met.
- Review team contributions against the assignment requirements.
- Prepare and rehearse the final presentation.
- Present NavigSA on behalf of the team.

3. Team Values and Principles

Core Values: Collaboration, Respect, Transparency, Accountability, Excellence.

Agile Principles: Continuous improvement through feedback, collaboration over rigid processes, delivering complete work regularly in short sprints, and adapting to changes based on feedback.

4. Communication Plan

Methods: WhatsApp (daily updates), Microsoft Teams (meetings), In-person meetings (weekly), Google Docs (collaboration), Trello (task tracking).

Meeting Frequency: Weekly meetings (minimum) and additional sessions during the final phase.

Team Leader Responsibilities in Communication

- Call and lead meetings, and share what needs to be discussed beforehand.
- Keep the Trello board up to date and check task statuses.
- Follow up on missing or late contributions.
- Make sure decisions are communicated to every team member.
- Confirm final readiness of the team before submission and presentation.

5. Goals and Milestones

SMART Goals

- Hold at least one team meeting every week, with daily check-ins on WhatsApp.
- Make sure every member has assigned tasks on the Trello board by Week 3.
- Have all contributions integrated and reviewed by Week 5.
- Complete at least one timed rehearsal of the presentation before the due date.

Milestones

- Week 3: Tasks allocated and backlog set up
- Week 4: Draft contributions reviewed
- Week 5: Final submission and presentation rehearsal

Reflection

Purpose of the charter

Our team charter set out who we are, what each person is responsible for, how we communicate, and the goals we are working towards. Having this agreed early meant we were not guessing about roles: Witcha edited and integrated our work, Tanatswa researched, Marc designed, and I led and presented. As Team Leader, my job was to make sure the charter became how we actually worked, not just a document we submitted.

What worked well

Applying Scrum gave the charter structure. We moved our work onto a Trello board, rewrote the Product Backlog as customer-focused user stories after our lecturer's feedback, planned Sprint 1, and recorded daily standups. This kept everyone's tasks visible and made it easy to see what was done and what was blocked. Our agreed communication channels also helped: WhatsApp for quick updates, meetings for decisions, and shared documents for collaboration. Our interviews with eight students gave the team real evidence to build on, which kept our values of transparency and excellence practical rather than abstract.

Challenges

Our biggest recurring challenge was dependency. In our standups, the same impediment kept appearing: we were waiting for confirmation from team members before work could be finalised. As leader, I learned that I must follow up earlier and make deadlines explicit for each person rather than assuming everyone has the same picture. I also had to balance two jobs: coordinating the team while preparing to present. Our short pitch format meant I needed to understand every part of the project well enough to explain it in a few minutes.

What I learned

I learned that leadership in an agile team is about facilitating, not controlling: removing blockers, keeping communication open, and creating space for feedback. I also learned that agile principles only work when the team lives them. Feedback from our lecturer improved our backlog, and the same habit of drafting, reviewing, and improving made our work stronger. Accountability became real once tasks had names and statuses on the board.

What I would do differently

- Review the charter with the team at the start of each sprint, and update it when our needs change.
- Agree on a specific due date for every task, so waiting for confirmation does not delay the sprint.
- Start rehearsing the presentation earlier, and give every member time to practise.
- Check in more often on how the team is feeling about workload, not only task progress.

Conclusion

The charter gave our team a shared foundation, and Scrum gave us a way to work from it. I have grown in confidence as a leader and presenter, and I now see that a strong team depends as much on clear communication and accountability as on individual skill.
